## IT PROJECT SPECIFICATIONS

---

### A.1 Overview

IT Project specifications are separated into specific technology types such as cable plant, security cameras, projection, etc...

This specification adds an overriding note in regards to project & construction management of all IT-related projects.

### B.1 Overriding Note

All IT-related projects will be managed by the Dean of Technology of the College or his/her authorized designee.

Where projects intersect, such as the construction of a building, the only official authorized to make changes/modifications to any IT-related work and/or area is the same.

In addition to any projects which intersect, the Dean of Technology or his/her authorized designee shall be involved in the general project management of the project.
