

CAREER STUDIES

ASSOCIATE IN APPLIED SCIENCE DEGREE PROGRAM

The Career Studies program is a highly individualized program of study that takes into account all the life experience that a person has had in the work world. Students can earn up to 24-credit hours by showcasing previous experiences through a Prior Learning portfolio which connects past work to college course outcomes. Students build a portfolio that documents their experience and how it aligns with the outcomes of college courses. Students then take other classes to complete the degree.

“My career was sort of stuck since I did not have a college degree. When I learned about the Career Studies degree, I had to check it out. It took me half as long to finish thanks to the program. Now I can be promoted at my company and become a supervisor.”

“The biggest problem I face in my company is not having workers whose skills are matched by their credentials. We need both the skills and credentials that certify professional level.”

Count your life experience to
fast-track toward a degree

CAREER STUDIES
DEPARTMENT CHAIR: MICHAEL TARDIFF, 207-453-5002

Associate in Applied Science Degree

The Career Studies program is a customizable program. Advising is essential for assistance with Prior Learning Assessment of work or training experiences and progression through this program. The Department Chair is the assigned advisor for students in this program and will work with students to create an academic plan.

The Chart below indicates minimum credit requirements in the three (3) blocks. Credits may increase based on exact course selections as some courses carry more credit value.

Students may use this sheet to list courses and track progress.
