

ELECTRICAL LINEWORKER TECHNOLOGY

CERTIFICATE PROGRAM

Electrical lineworkers (ELWs) have skills and job opportunities that are very rare in the modern age. At a time when jobs are always changing and becoming obsolete, the electrical lineworker stays stable.

When storms arrive, someone needs to repair the electrical distribution system. The work is steady, the wages are solid, and the company culture is loyal. Like police officers, the first priority is returning safely home to one's family. If you believe in safety, stability, loyalty, and toughness, come to KVCC's lineworker program.

"A person needs to love the outdoors to be a lineworker, and I never regretted getting into it. I make a good living, am part of a company that believes in loyalty, and I have real options to be promoted in the long run. It all started with KVCC."

Become a powerline technician to keep the electricity and services flowing

What Electrical Lineworker Technology graduates do:

- Set electrical/telephone poles
- Observe safety protocols
- Perform cable inspections
- Observe codes and industry standards
- Install and repair electrical lines
- Troubleshoot and install transformers and reclosures
- Inspect transmission and distribution systems and components
- Install and maintain hardware and equipment associated with the electrical power line industry

Career Opportunities:

- Electrical companies (outdoors)
- Line construction firms (outdoors)
- Utilities cooperatives (outdoors)
- Training centers and programs

ELECTRICAL LINeworker TECHNOLOGY

Certificate

First Semester

ELW150*	Lineworker Training	8
ETL109*	Direct Current Theory	3
MAT114	Technical Math	3

Second Semester

ELW160*	Lineworker Training II	8
ENG108	Technical Writing	3
ETL110*	Alternating Current Theory	3

Total Credits	28
----------------------	-----------

CRITERIA FOR GRADUATION

Students must complete 28 credits in the Electrical Lineworker Technology program and achieve a minimum grade of “C” in all core courses (*). Students must attain a final GPA of 2.0 or higher.

ELECTRICAL LINeworker TECHNOLOGY

Certificate

DESCRIPTION

The Electrical Lineworker Technology program is a one-year Certificate program. The program will provide students with the technical background and the manual skills necessary for careers in the installation and maintenance of electrical power, telephone, and cable television systems. Safety, pole climbing, and teamwork are emphasized throughout the program while the student learns and performs overhead and underground construction.

Students will be exposed to such curriculum topics as AC/DC electrical theory, field training, occupational safety, line construction theory, tree trimming and line clearance, rigging, transformers, basic telecommunications, and utility metering. Approximately two-thirds of the program will be devoted to strenuous hands-on skills, allowing students to develop a high degree of proficiency in the use of electrical lineworking equipment and procedures.

Students are required to have a valid Class B Commercial Driver’s License (CDL) permit (Class A recommended). License is not required, but strongly encouraged. Climbing gear and all necessary tools for the field portion of the program are also required; the climbing gear and tools range in price from \$1,800 to \$2,200. In addition, students are required to have lineworker safety toe boots with steel shanks; these boots range from \$200 to \$300.

PROGRAM MISSION

The Electrical Lineworker Technology Program strives to maintain a high academic standard for teaching and learning lineworker technology through a continuous process of self-assessment and

improvement. Students are exposed to a learning environment that is safe and supportive of student growth and achievement. Using modern training equipment, innovative training methods and highly trained faculty members, the ELT program endeavors to fully prepare students for a variety of line occupations.

EDUCATIONAL OUTCOMES

Upon successful completion of the Electrical Lineworker Technology program, the graduate is expected to:

1. Practice the electrical skills of the profession in a conscientious, responsible, and accountable manner while recognizing the need to continue to expand their technical knowledge and skills.
2. Safely climb poles and operate line bucket trucks and pole setting equipment when performing overhead line construction.
3. Use critical thinking skills and problem-solving techniques, along with acquired analytical skills, to solve problems encountered in residential, commercial, or industrial field situations.
4. Work as part of a team when performing the tasks associated with electrical line work.

COLLEGE ADMISSION

General admission guidelines can be found on [page 33](#) in the catalog. In addition to these guidelines, applicants must have a CDL (Commercial Driver’s License) permit for admission to this program.
