

# PLUMBING & HEATING TECHNOLOGY

## ASSOCIATE IN APPLIED SCIENCE DEGREE AND CERTIFICATE PROGRAMS

The Plumbing and Heating Technology program is designed to prepare students for technician level positions in the rapidly growing field of installing, maintaining, and troubleshooting high efficiency plumbing, heating, and air conditioning. Graduates will work on systems that control water, temperature, and humidity of enclosed spaces.

---

“I always knew I wanted to go into heating. What I have learned at KVCC is that the world is changing and there are newer ways to heat than the old oil boilers.”

**Learn to install, maintain, and troubleshoot modern heating, and cooling systems**

### What Plumbing & Heating Technology graduates do:

- JIT Plumber
- Resource conservation manager
- Energy management technician
- Journeyman oil burner technician
- HVAC technician

### Career Opportunities:

- Educational facilities
- Small businesses
- Plumbing and heating firms
- Hospital facilities
- Manufacturing companies
- Industry plants

## Associate in Applied Science Degree

### First Semester

BPT124*	Construction Print Reading for Plumbers . . . . .	3
COM104	Introduction to Communication . . . . .	3
MAT114	Technical Math . . . . .	3
PLB101*	Plumbing Fundamentals . . . . .	6

### Second Semester

ENG108	Technical Writing . . . . .	3
MAT214	Technical Math II . . . . .	3
PLB201*	Advanced Plumbing Applications . . . . .	6
PLB210*	Heating and Plumbing Codes . . . . .	3

### Third Semester

ETL107*	Electrical Principles for HVAC . . . . .	4
HAC106*	Heat Pumps and Air Conditioning . . . . .	3
HAC200*	Introduction to Natural Gas and Propane . . . . .	1
HAC201*	Heating System Fundamentals . . . . .	6
SOC109	Technology and Society (SS) . . . . .	3

### Fourth Semester

ETL108*	HVAC Electronics and Controls . . . . .	3
HAC202*	Advanced Heating Applications . . . . .	6
HAC205*	Propane and Natural Gas . . . . .	3
HIS205	Architectural Styles of New England (H) . . . . .	3

**Total Credits** **62**

---

## Plumbing Certificate

### First Semester

BPT124*	Construction Print Reading for Plumbers . . . . .	3
MAT114	Technical Math . . . . .	3
PLB101*	Plumbing Fundamentals . . . . .	6

### Second Semester

ENG108	Technical Writing . . . . .	3
PLB201*	Advanced Plumbing Applications . . . . .	6
PLB210*	Plumbing Codes . . . . .	3

**Total Credits** **24**

---

## Heating Technology Certificate

### First Semester

ETL107*	Electrical Principles for HVAC . . . . .	4
HAC106*	Heat Pumps and Air Conditioning . . . . .	3
HAC200*	Introduction to Natural Gas and Propane . . . . .	1
HAC201*	Heating System Fundamentals . . . . .	6
MAT114	Tech Math I . . . . .	3

### Second Semester

ETL108*	HVAC Electronics and Controls . . . . .	3
HAC202*	Advanced Heating Applications . . . . .	6
HAC205*	Propane and Natural Gas . . . . .	3

**Total Credits** **29**

---

## CRITERIA FOR GRADUATION

Students must complete 62 credits in the Plumbing and Heating Technology program, 24 credits in the Plumbing certificate, or 29 credits in the Heating Technology certificate and achieve a minimum grade of "C" in designated common and program core courses (\*). Students must attain a final GPA of 2.0 or higher. (H,SS) Suggested Electives. Please contact your advisor for more information

# PLUMBING & HEATING TECHNOLOGY

## Associate in Applied Science Degree, Certificates

### DESCRIPTION

The Plumbing and Heating Technology program offers a two-year Associate in Applied Science degree, a Plumbing certificate, and a Heating Services certificate. The program is designed to prepare students for technician level positions in the rapidly growing field of installing, maintaining, and troubleshooting high efficiency plumbing, heating, and cooling systems in buildings. Graduates will work on systems that control water, temperature, and humidity of enclosed spaces within building structures. They will install various types of equipment used to control human comfort in residential, commercial, industrial, and institutional environments.

This program will give the technician a working knowledge of plumbing and HVAC system building concepts and energy efficient design principles. Additionally, program graduates are eligible for State of Maine licensing in plumbing, oil burner, propane and natural gas. Students can also pursue the EPA608 refrigeration certification. Combined with the appropriate additional coursework, graduates will also have the necessary educational background and licenses needed for advancing into a career in renewable and sustainable energy systems.

Students are required to have the tools and equipment necessary to properly complete the hands-on portion of the program. The required tools and equipment will be in the range of \$1,200 - \$1,400.

### PROGRAM MISSION

The Plumbing and Heating Technology program provides graduates with the technical background and the manual skills necessary for careers in the installation and maintenance of modern, energy efficient, plumbing, heating, and air conditioning systems. Graduates are critical thinkers and are able to troubleshoot problems in residential, commercial,

or industrial environments. The program provides students with the ability to communicate effectively using standard methods of communication.

Recognizing the need for lifelong learning, the Plumbing and Heating Technology program helps students achieve various professional and personal goals that may arise over a lifetime, including the opportunity to transfer to other college and university technical programs. The program strives to maintain a high academic standard for teaching and learning through a continuous process of self-assessment and improvement.

Students are exposed to a learning environment that is safe and supportive of student growth and achievement. Using modern training equipment, innovative teaching methods and highly trained faculty members, the Plumbing and Heating Technology program endeavors to fully prepare students for a variety of building energy system occupations.

### EDUCATIONAL OUTCOMES

Upon successful completion of the Plumbing and Heating Technology program, graduates are expected to:

1. Practice the skills of the profession in a conscientious, responsible, and accountable manner while recognizing the need to continue to expand their technical knowledge and skills.
2. Communicate effectively and listen and respond appropriately to a variety of residential, commercial and industrial applications.
3. Think critically and use their acquired analytical skills to solve problems encountered in a residential, commercial or industrial environment.

### COLLEGE ADMISSION

General admission guidelines can be found on [page 33](#) in the catalog.
