

NURSING ADN PROGRAM

ASSOCIATE IN SCIENCE DEGREE PROGRAM

Nursing is the largest healthcare profession in the United States, providing limitless and rewarding career opportunities for graduates. The Associate Degree in Nursing at KVCC prepares students to care for individuals and families, helping them attain, maintain, or recover optimal health and functioning.

The Associate Degree Nursing Programs, both generic and LPN to ADN at Kennebec Valley Community College located in Fairfield, Maine is accredited by the: Accreditation Commission for Education in Nursing (ACEN).

3390 Peachtree Road NE, Suite 1400
Atlanta, GA 30326
(404) 975-5000

The most recent accreditation decision made by the ACEN Board of Commissioners for the Associate Degree nursing programs is continued accreditation.

View the public information disclosed by the ACEN regarding this program [on the ACEN website](#).

The KVCC Nursing Programs have full approval from the Maine State Board of Nursing.

Maine State Board of Nursing
161 Capitol Street, 158 State House Station
Augusta, Maine 04333-0158

**Become a registered nurse
and make a difference.**

What Nursing Graduates Do:

- Provide direct care to patients
- Conduct physical examinations
- Perform diagnostic testing
- Analyze results tests and interventions
- Utilize monitoring equipment
- Administer treatments/medications
- Provide emotional support to patients and their families

Career Opportunities:

- Hospitals
- Medical offices
- Maternity and pediatric settings
- Rehabilitation/Long-term care centers
- Critical care units
- Dialysis facilities
- Cancer treatment centers
- Surgical centers
- Behavioral health facilities/units
- Home health agencies

Associate in Science Degree Curriculum

*Prerequisites** (Required within the Nursing Program curriculum and for entry into the program.)

First Semester	Credits	Third Semester	Credits
BIO213 <i>Anatomy & Physiology I*</i>	4	BIO219 Microbiology	4
ENG101 <i>College Composition*</i>	3	NUR224 Nursing Across the Lifespan II	9
MAT111 <i>Quantitative Reasoning*</i>	3	PSY215 Developmental Psychology	3
NUR118 Foundations of Nursing	8		
NUR119 Transition to ADN Education	1		
Second Semester	Credits	Fourth Semester	Credits
BIO214 Anatomy & Physiology II	4	COM104 Introduction to Communication.	3
NUR122 Nursing Across the Lifespan I	9	NUR227 Nursing Across the Lifespan III	7
PSY101 Introduction to Psychology	3	NUR229 Transition to Nursing Practice for the ADN	2
		PHI101 Introduction to Philosophy (H).	3
NUR126 LPN Transition to the ADN Role**	1	SOC101 Introduction to Sociology	3
**Required of LPN applications. Must be taken concurrently with NUR122 in the second semester.		(H) Suggested Elective. Contact your advisor for information.	
Total Credits69			

CRITERIA FOR GRADUATION

To graduate, students must achieve a minimum grade of “C” in all courses (a final GPA of 2.0 or higher) and a “satisfactory” rating in the clinical portion of each nursing course. Students are graded “satisfactory” or “unsatisfactory” in the clinical component of nursing courses.

ADN PROGRAM

Associate in Science Degree

DESCRIPTION

The Nursing Program prepares graduates for entry level positions in the nursing profession. Successful completion of the ADN program of study qualifies graduates to receive an Associate in Science Degree in Nursing (ADN). The ADN qualifies the graduate for the National Council Licensure Examination (NCLEX-RN) and application for state licensure as a registered nurse (RN) in the state of Maine.

The KVCC Nursing Programs are approved by the Maine State Board of Nursing (MSBON) and accredited by the Accreditation Commission for Education in Nursing (ACEN).

The program of study combines general education and nursing studies in the classroom with selected laboratory, simulation, and clinical experiences providing nursing care to patients in a variety of healthcare settings.

Nursing courses require students to participate in approximately 18 to 24 hours per week of classroom and clinical activities. Attendance is essential.

Students may be scheduled for day, evening, and weekend clinical experiences throughout the program. It is expected that students will be able to make the necessary arrangements to complete all scheduled rotations.

General education courses supportive to the nursing major must be taken prior to or concurrent with nursing courses as stipulated in the curriculum design. Completion of all non- nursing general education courses is strongly recommended prior to program entry.

Nursing courses must be taken in consecutive semesters. Students must achieve a minimum grade of “C” in all required general education and nursing courses in order to progress through the curriculum. A general education course may only be repeated once in order to achieve the minimum grade.

Applicants to the Nursing Program should be aware that nursing at the Associate Degree level involves the provision of direct care to patients.

A student in the Nursing Program must have the knowledge and ability to effectively assess a patient's biopsychosocial needs. Furthermore, the student must be able to analyze data in order to state a patient's problem, comprehensively plan independent and collaborative interventions, implement the plan of care, and evaluate the care given, as well as the patient's response to the care. Therefore, the student must have observational, communication, motor, cognitive, psychosocial, and behavioral abilities sufficient to carry out the above responsibilities. Technological accommodation can be made available for some disabilities in some of these areas, but a student must be able to perform in a reasonably independent manner. The use of a trained intermediary is not permitted since a student's judgment would be influenced by someone else's observations.

In order to be considered for admission or to be retained in the Nursing Program, all applicants must have the following abilities and skills:

1. A visual acuity with corrective lenses to identify cyanosis, absence of respiratory movement in patients; read small print on medication containers, healthcare providers' prescriptions, monitors, and equipment calibrations.
2. A hearing ability with auditory aids to understand the normal speaking voice without viewing the speaker's face; hear monitor alarms, emergency signals, call bells from patients and telephone orders; take/hear blood pressure, heart, lung, vascular, and abdominal sounds with stethoscope.
3. The physical ability to stand for prolonged periods of time, perform cardiopulmonary resuscitation, lift, move, and reposition patients, and move from room to room or maneuver in limited spaces.
4. Effective communication in verbal and written form by speaking clearly and succinctly when explaining treatment procedures, describing patients' conditions, and implementing health teaching. Write legibly and correctly in patients' charts for legal documentation and enter data accurately in the electronic medical record.
5. The manual dexterity to use sterile techniques to insert catheters, withdraw blood, and prepare and administer all medications.
6. The tactile ability to palpate pulses, determine warmth and coolness, detect enlarged nodes and lumps.
7. The ability to function safely under stressful conditions and the ability to adapt to a dynamic environment inherent in clinical situations involving patient care.

The Nursing Program is designed to keep pace with current healthcare trends and technology in order to meet the dynamic healthcare needs of the community, and to prepare students for the challenges of the nursing profession. The curriculum is subject to change without notice in order to comply with the requirements of accrediting agencies, clinical facilities, and/or the College. For the most current information, applicants should visit the KVCC Nursing Program website at [Nursing](#)

Students in the Nursing Program are expected to be computer proficient in keyboarding, word processing, and the use of the Internet. All nursing courses are Brightspace enhanced courses. Ideally, students should have off-campus internet access in order to complete online course activities. Students who are not successful in a nursing course do not progress to the subsequent nursing course; unsuccessful students must withdraw from the Nursing Program. Students who are not successful in completing a nursing course may be considered for re-admission to the Nursing Program one time only. Acceptance for re-admission depends upon:

1. the overall past performance of the applicant;
2. completion of actions taken by the applicant for remediation;
3. availability of space in the Nursing Program;
4. program duration limits.
5. additional coursework/testing.

Students who are not successful in the first semester nursing course (NUR118) must apply to restart the Nursing Program through the Admissions Office. Current admission requirements must be met. Re-entrance into the 2nd, 3rd, or 4th semesters is done by petitioning the Academic Dean and the nursing faculty.

NOTE: All applicants to the Nursing Program should be aware that the Maine State Board of Nursing may refuse to grant a license on the basis of criminal history record information relating to convictions denominated in Title 5, Chapter 341, subsection 5301 of the Maine Revised Statutes Annotated. To participate in the Nursing Program, students must attest to criminal history and pending criminal data. Convictions and pending charges of concern will be reviewed by clinical agencies to determine if students can work at these sites. Students who are not accepted at a clinical agency will not be able to meet program requirements, resulting in dismissal from the Nursing Program. Students found to be untruthful or misleading on the attestation statement may be dismissed from the Nursing Program.

PROGRAM MISSION

The purpose of the Nursing Program is to educate graduates who will function competently as entry level Associate Degree nurses. The curriculum is designed to provide students with learning opportunities which integrate theoretical knowledge with clinical practice. Students will be encouraged to review, assess, and analyze information in order to make sound clinical judgments, to think conceptually. Graduates of the Nursing Program are prepared to provide safe and compassionate nursing care to individuals and families in a variety of acute, long-term, and community healthcare settings.

PROGRAM PHILOSOPHY

The Nursing faculty believes that the Nursing program subscribes to the philosophy of Kennebec Valley Community College. The College endeavors to provide a balance between occupational and academic competencies and to promote the development of individuals so that they can meet the changing needs of the community. The Nursing faculty collaborates with advisory board members and the staff/administration of selected healthcare facilities to assure that proper entry-level knowledge and technical, critical thinking, and interpersonal skills are possessed by graduates. In a caring and supportive environment, the Nursing Department provides opportunity for student development inspired by shared values of integrity, accountability, and community service.

EDUCATIONAL OUTCOMES

Upon successful completion of the Associate Degree Nursing Program, the graduate will:

1. provide holistic care, utilizing the nursing process, to individuals and families across the life span and the wellness-illness continuum;
2. provide safe and ethical care based on research, using information and technology to support decision-making and improve quality;
3. demonstrate legal and ethical accountability for the delivery of caring and competent nursing care using professional communication with interdisciplinary team members.

ADMISSION REQUIREMENTS

Please refer to the General admission guidelines in the Course Catalog at [KVCC Admissions](#). Additional admission requirements are as follows:

Immunization and CPR Requirements

1. Current CPR Certification - Basic Life Support (BLS) from the American Heart Association (AHA).
2. Proof of immunization against TDAP within the last ten years.
3. Proof of immunization against Measles, Mumps, and Rubella (MMR). If non-immune, two doses MMR vaccine is required for persons born after 1957.
4. Proof of immunization against Hepatitis Series B and Titer (6+ month process). If non-immune, a waiver is required.
5. Proof of immunization against chicken pox with a Varicella Titer. If non-immune, two doses of Varicella virus vaccine is required.
6. An influenza vaccine is required annually in the fall by all healthcare facilities.
7. Optional: COVID-19 vaccine is recommended, but not required. Clinical placements may be impacted as some clinical agencies require proof of vaccination.

Required College Courses and Minimum Grade

1. BIO213 Anatomy and Physiology I - "B" (3.0)
2. ENG101 College Composition - "B" (3.0)
3. MAT111 Quantitative Reasoning - "B" (3.0)

Required Academic Standing

Cumulative grade point average of 3.0 is required. Students are academically evaluated on a case-by-case basis using multiple measures.

Test of Essential Academic Skills (TEAS)

1. May be taken a total of three times; original test session plus two retakes
2. TEAS may be taken twice in an academic year (November to July)
3. Each re-take includes all subtest scores and may only be taken after a 45-day waiting period
4. Exam consists of Reading, Math, Science, and English and Language Usage
5. Free preparatory sessions are offered through the Student Success Center
6. Registration is completed in the student portal
7. Minimum composite score 70th percentile rank

Nursing Program Orientation

Upon successful completion of the above entrance requirements, students will receive an acceptance letter. Students must attend a required Accepted Student event scheduled in June and Program Orientation in August. Students will be notified of the dates for these sessions by the College and/or Department Chair. Failure to attend these required Orientation events can jeopardize admission status to the program.

Transfer Applicants

Transfer applicants must meet the current Nursing Program admission requirements. Additionally, they must submit a letter of reference from the Chairperson of their former nursing program. Clinical nursing credits must be approved by the Chairperson of the KVCC Nursing Program and cannot be more than one (1) year old. Once transfer students are admitted to the Nursing Program, they have one (1) opportunity to complete the Nursing curriculum. Transfer students are required to complete a minimum of two (2) academic semesters in order to meet graduation and residency requirements.

PROGRAM INFORMATION

Criminal Background Screening

Applicants to certain programs need to note that a criminal background screening will likely be required while enrolled in the program or as a condition of employment in the field. Certain internship and/or practicum sites, such as healthcare facilities, may limit or deny clinical privileges to those students who have a prior or current criminal record.

- Should a clinical facility refuse to permit a student to complete a clinical rotation based upon the student's criminal background screening, the student may not be able to complete the program. In the event a student is denied placement at a clinical site the College will likely be required to enter an academic dismissal from the program.
- Additionally, certain licensing boards may refuse to issue a license to practice based upon prior or current criminal offense(s). To learn more about whether the program or profession in which you are interested has such requirements or limitations, contact the appropriate Department Chair.

Infectious Diseases

Applicants who consider a career in Nursing or any Allied Health professions should be aware that during the course of their education and subsequent employment, they will be working in situations where exposure to infectious diseases is probable. This is an occupational risk for all healthcare workers. Persons should not become healthcare workers unless they recognize and accept this risk. Proper education and strict adherence to well-established infection control guidelines, however, can reduce the risk to a minimum. Thorough education in infection control procedures is an integral part of each healthcare program.

Exposure to Latex

Additionally, applicants should be aware that exposure to natural rubber latex (NRL) is likely. Individuals exposed to NRL products may develop allergic reactions such as skin rashes; hives; nasal, eyes, or sinus symptoms; and, rarely, shock.

Costs

Costs associated with required immunizations, criminal background screenings, finger printing (when applicable) and admission testing are the responsibility of the applicant.

Clinical/Fieldwork Placement

Students may be scheduled for day, evening and night clinical/fieldwork experiences in some programs. It is expected that the student is able to make the necessary arrangements in order to complete all scheduled times. Placement is statewide. The student is responsible for all travel and/or living expenses related to the clinical or fieldwork experience.

Drug Testing

Drug testing may be a requirement of clinical/fieldwork education sites. Students will be responsible for the cost of such testing if required by the site.
