

MECHANIZED LOGGING OPERATIONS AND FOREST TRUCKING

FREE FOR TRAINEES

START YOUR CAREER IN LOGGING AND FOREST TRUCKING

BECOME SKILLED IN EQUIPMENT OPERATION, MAINTENANCE, AND EARN YOUR CDL

Earn hands-on experience within the forest environment and expand your skillset in this dynamic industry-recognized program. Knowledge gained will give you a competitive edge in securing employment and advancing your career, while allowing you to work in the outdoors, anywhere in Maine, with the tools for higher earning potential.

This program will prepare you for the operations and maintenance of the most current equipment available, and teach you to drive log and chip trucks, so you can begin your career in the logging industry.

Learn to operate and maintain a processor, forwarder, feller buncher, delimber, grapple skidder, crane / slasher, loader, and log trucks. Now is the time to earn your CDL-A and prepare for a new career in logging.

Training includes:

- Harvesting laws, environmental regulations and practices pertaining to forestry, boundary lines, basal areas and vernal pools.
- Information on Maine's forest economy, marketing, utilization, equipment, logging techniques and more.
- Safe operations and basic maintenance and repair of the most current equipment on the market.
- CDL-A permit and preparation for state driving exam.
- Industry-recognized safety certifications and demonstration of competency of all required logging operation safety standards.
- A cooperative team approach towards mechanical forest operations to accomplish the goals of selection, harvesting, transporting, and delivery to markets.
